

OUR SERVICE

Fire hydrants stand like sentries, ready for action when there is a fire event. Make sure that they are ready when the time comes with proper inspection and maintenance. RMS Utility Services will inspect your hydrants, recommend maintenance options and repair as needed. We can also advise solutions for identification of hydrants for visibility and flow ratings.

SPECIALIZING IN

Our service team will inspect and assess your hydrants, provide you with reports and service your hydrants to ensure that they are in top working order. We specialize in private property hydrant inspection and maintenance.

- Repairs on most models of fire hydrants (provided that OEM parts are still available)
- Inspection and lubrication
- Flow testing and GPM calculations
- Isolation valve exercising
- Repair of operational deficiencies
- Hydrant and road marker consulting and installation
- Analysis and complete documentation of services rendered for reporting to fire and insurance agencies
