

OUR SERVICE

Need to isolate or bypass a line? Consider RMS Utility Services for your next line isolation project! Our service experts are well experienced and trained in line stopping from 2" - 60" diameters. We take great care from the most standard installation to specialty projects. Our services include cleaning and preparing the pipe, mounting the sleeve, installing the valve and pressure testing for integrity. Our 24/7 Response commitment ensures that you will be able to get a hold of us when you need us and we never require you to tie up your people at the jobsite, enabling you to get on with your work!

SPECIALIZING IN

Live stopping on a large range of piping including Cast or Ductile Iron, Carbon or Stainless Steel, Transite / Asbestos Cement, Precast Concrete Cylinder pipe for water or PVC. Our folding heads in sizes 14" - 54" reduce the cost of fittings, putting more money in your pocket. We have the ability to install multiple line stops and our new line stop design offers you the ability to leave the line stop as-is, **or convert it to an AWWA approved PERMANENT valve all in under 2 hours.** Value add for your customer!

- Available in sizes ranging from 2" - 60" diameters
- Multiple line stopping ability and can be installed in under 2 hours
- **Featuring 14" - 54" folding heads** allowing line stops to be done using a smaller flanged fitting than the line size resulting in **less cost to you!**
- **New line stop design** offers you the ability to decide if you want a permanent R/W valve or leave the line stop in place for future use. **Put the power of timing in your hand!** With a new removable bonnet, we install the line stop and you can get on with your work, open/close the slide gate, backfill and call us when it's time to pick up the bonnet.
