

OUR SERVICE

Problem: I know I have excess inflow and infiltration entering my system but how do I know where to start to track it down?

Control of information is now available for your collection system with the newest release of ManholeMinder™ which has partnered with RMS Utility Services to provide our clients with an innovative, robust and unique software tool that offers a 5000-ft view of your collection system with the power to analyze, budget and report on the weak links that are costing you capacity and treatment dollars. **Provide proof to the board with video tools, measurements and exact recommendations for repair and get your projects approved and completed more quickly!**

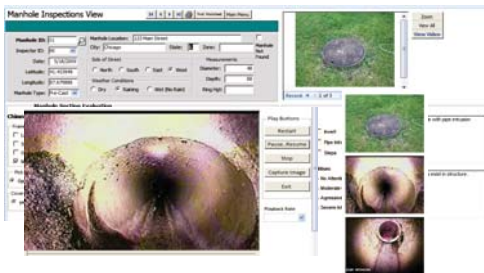

It all starts with our **NASSCO® certified inspection crew** carefully scrutinizing your manhole collection system, reporting problems and entering data into the software system for your immediate review (all data is delivered in real time format so you can constantly track progress!) This crucial step is what differentiates RMS Utility Services from other service companies. We then spend time consulting with you and your staff on problem areas, potential solutions and teach you how to make the most out of the ManholeMinder™ tool.

DYNAMIC EXECUTIVE & DETAIL LEVEL REPORTING

Create customized reports, sort data by any condition variable, measure costs, use dynamic drill down reports, run real time reports, link to your GIS system, and much more!

TRACK, ANALYZE, PLAN, BUDGET, REPORT

View your system from the comfort of your desk with video imaging, measurements, and condition descriptions with the inspection viewer

Studies have shown that much of the groundwater and surface water that enters the sewer systems does so through manholes, making them a potential weak link in the system"

TURN KEY SERVICES

We inspect the entire manhole from chimney to base, looking for points of inflow and infiltration and reporting back to our system

Your manhole inspection analysis becomes a dynamic TOOL by allowing you to make changes to the data as you make repairs.

Tired of paper reports sitting on a shelf and never getting a second look? Use the software to run summary and detail reports to quickly assess and isolate problem areas in your system.

ManholeMinder

CERTIFICATIONS

We are certified by Nassco® for manhole, pipeline & lateral inspection & assessment
