

OUR SERVICE

RMS Utility Services is well specialized in valve evaluation, valve actuation and valve repair and is here to help you make the most of your plant systems. From installing new acutation devices, repairing your existing control valves and actuators to offering a maintenance program that helps you sleep easy at night, you can feel confident that our service department can respond quickly and accurately so you avoid untimely delays and extra work. Let us provide you with an evaluation of your system valves.

16" GA Valve in Glenwood, IL

SPECIALIZING IN

We offer our abilities and aptitude to review one valve or many valves in your entire system. We are able to analyze and consult your organization based on your specific needs from restoration or replacement of existing air valves, control valves, check valves, and more. Our knowledge and experience from over 20 years in the plant and control valve industry enables us to help you create a program for evaluation and repair based on the highest return for your plant. With the ability to retrofit and adapt any manufacturer's valves for actuation, you can stretch your plant dollars further by keeping your existing actuation devices in working order.

- Pressure Reducing Control Analysis
- Pressure Relief / Sustaining Valve Analysis
- Air Release Valves and Vacuum Protection

RMS not only did a great job on the installation but were very informative in answering our questions. We had some preconceived ideas and they were able to show us the proper way of installing these valves. We then were able to install the next set that needed to be replaced ourselves and do it correctly. I feel it was money well spent and wouldn't hesitate to do it again"

David Leslie, Water Department
Crew Chief, Village of Oak Lawn, IL
